Subject Index

2',5'-oligoadenylate synthetase, 93

α_1 -antitrypsin, 405

$\alpha\beta$, 464

abortifacient, 248

ABPA, 323

aCL-ELISA, 265

adenosine deaminase, 286

adhesion, 456

adhesion formation, 108

adhesion molecules, 292

AIDS, 56, 65, 142, 149, 248, 356

allo-MHC, 126, 132

anti-CD4, 301

anti-DNA antibodies, 34

anti-DNA antibody, 418

anti-HS reactivity, 34

anti- α -Gal antibodies, 85

anti- β_2 glycoprotein 1 antibodies, 269

anti-dsDNA, 39

anti-glomerular basement membrane disease, 259

anti-inflammatory substances, 273

anti-mitochondrial antibodies, 259

anti-phospholipid antibodies, 265

anti-platelet antibody, 452

anti-tumour, 308

antibody, 56

antibody penetration, 396

antibody response, 331

antibody-dependent cellular cytotoxicity, 56

antibody-forming cells, 223

anticardiolipin antibodies, 19, 269

antigen presentation, 120

antiphospholipid antibodies, 269

antiphospholipid syndrome, 269

apoptosis, 65

Aspergillus fumigatus, 323

atherosclerosis, 242

autoantibodies, 26, 265

autoantibody, 11, 253

autoimmunity, 1, 85, 253

autoreactivity, 370

avidity, 331

β -glucan, 189

β_2 glycoprotein 1, 269

β_2 -GPI, 265

B cell activation, 195

B cells, 212, 253

B lymphocyte, 200

B lymphocytes, 26

baculovirus expression, 19

Borna disease virus, 370

breast tumours, 437

bromocriptine, 200

BTS 3155, 313

C3, 411

C4, 411

C-ANCA, 405

cardiolipin, 265

CD11/CD18, 344

CD14, 184

CD21, 195

CD24 antigen, 279

CD4 cells, 356

CD4⁺ lymphocytes, 152

CD4⁺CD8⁺ cells, 430

CD4⁺CD8⁺ cells, 430

CD8 and CD56, 142

CD8 cells, 356

CD8 lymphocyte subsets, 51

CD8⁺ lymphocytes, 350

cell surface RNP, 396

Chagas' disease, 85

chimeric, 301

clinical stage, 45

cluster-w4 antigen, 279

clusterin, 242

collagen arthritis, 318

collagen gene expression, 103

complement, 242

complement activation, 248

complement component C1q, 237

complementarity-determining region, 26

cord blood mononuclear cells, 479

CR2, 195

Crohn's disease, 97

cross-reactivity, 34

cyclosporin A, 200, 313, 318, 323

cytokine interaction, 471

cytokine production *in vivo*, 206

cytokine-producing cells, 223

cytokines, 165, 387

cytotoxic T cell, 363

cytotoxic T lymphocyte precursor, 126, 132

cytotoxic T lymphocytes, 356

cytotoxicity, 308

delayed-type hypersensitivity, 172

dexamethasone, 323

disease progression, 337

double negative, 464

ELISA, 157

endothelial cells, 292

eosinophil, 115

epitope mapping, 279

Epstein-Barr virus, 195

Fc portion, 452

feline immunodeficiency virus, 65

fibrosis, 103

FK506, 200

flow cytometric adhesion assay, 456

flow cytometry, 286

gene expression, 411

gene regulation, 178

glycolipids, 72

glycosylation, 19

gp120, 152

Graves' disease, 430

GroEL, 377

haemin, 308

haemophilia, 152

Haemophilus influenzae type b, 157

Hashimoto's disease, 430

HDL, 242

heart transplantation, 448
